

MEDIA SYSTEM

KINDS OF MEDIA

- **VINYL** – Synthetic resin or plastic consisting of polyvinyl chloride. Often used as a sticker component.
- **POLYETHYLENE TEREPHTHALATE (PET)** – A plastic resin and form of polyester. It is a combination of PVC and Polyester that's highly durable and heat resistant. Good for food and non-food product labels also it is a recyclable material.
- **POLYPROPELENE (PP)** – Thermoplastic polymer used in wide variety of application. It is often used in packaging and labeling. It is non-toxic, odor less and light weight.
- **FERROUS** – indicates a compound that contains iron. A higher density of iron particles and a superior print quality.
